WELCOME message

Dear Colleagues,

On behalf of the Egyptian Society of Laparoscopic Surgery, I would like to welcome you in Egypt, the land of civilization. In such warm winter and close proximity to the legendary pyramids, we are here again for the 14th time to share together the updates in experience with different Laparoscopic procedures.

The usual joint with the winter meeting of the Mediterranean & Middle Eastern Surgical Association adds a significant value to the congress, together with our distinguished guests from different Arab and other global countries, as well as the eminent Egyptian scientists.

We wish you a fruitful congress, pleasant stay, and see you again in February 2018.

President
Prof. Faheem Basiouny

The background of the entire image is a photograph of surgeons in an operating room. Two surgeons are visible, wearing blue scrubs, blue bouffant caps, and white surgical masks. They are looking down at a patient, whose face is partially visible. The scene is brightly lit by overhead surgical lamps, creating a clinical and professional atmosphere. The image has a slight blue tint, especially towards the edges.

VALLEYLAB™ LS10

LS Series single channel
Vessel Sealing Generator

THE 3RD GENERATION OF LIGASURE™ TECHNOLOGY

LigaSure™ technology is now accessible everywhere. Benefit from its simple, plug-and-play design as well as its portability when transporting the generator between operating rooms. The Valleylab™ LS10 generator delivers the next generation of LigaSure™ technology, allowing anyone in the operating room to reach beyond traditional ligation.

INTELLIGENT TISSUEEFFECT™ TISSUE SENSING TECHNOLOGY¹

Applies appropriate energy to targeted tissue, for an effective seal with minimal thermal spread in vessels up to 7 mm and tissue bundle.²

INTUITIVE CONTROL PANEL

Single power on/off button, single LigaSure™ instrument plug-in port.³

FAST SEALING

Seals in 2-4 seconds⁴

COMPACT & LIGHTWEIGHT

Uses minimal space and is easily portable.⁵
